Earth 8ight

We base our importance of food and nutrition from Yasuhiro Funakoshi of the WARA Food Club and receive school meals from Central Foods, which specializes in organic and natural food. We believe that healthy and good food leads to a strong body and mind for children to have experience-rich early childhood years.

CORE VALUE 1

Food Education

To foster the well-being of children, we ensure that both the school lunches and snacks are free of additives. Children are given the responsibility for their food portion, so that they are able to foster autonomy. Afternoon snacks are made at school promoting a healthy eating environment.
